

## Spotlight on Aluminium: Industry Experience & Innovation at SIS 2025

We're pleased to announce a dedicated **Aluminium Special** at the upcoming **22<sup>nd</sup> Surface Inspection Summit (SIS 2025)**, taking place on **20 November 2025 in Aachen, Germany**.

Organised in cooperation with **AMAP – The Aluminium Research Cluster at the RWTH Aachen University**, this special session will coincide with the 100<sup>th</sup> AMAP Colloquium and will highlight practical case studies and advanced technological developments from across the aluminium industry.

### What to Expect

This Aluminium Special will bring together producers, researchers, and technology providers to share real-world solutions and discuss future-oriented innovations in surface inspection with a focus on specific demands for the aluminium value chain. Confirmed contributions include:

- **Aluminium Norf GmbH** in collaboration with **IMS Messsysteme GmbH** – Implementation of a surface inspection system (SIS) into an aluminium ingot scalper
  - Speaker: Stefan Lukaschewski
- **AMETEK Surface Vision** – Enhancing surface quality in aluminium production with video-based inspection: two case studies
  - Speaker: Volker Kölmel
- **ISRA VISION** Extending the Scope of inspection towards extruded products
  - Speaker: Dominik Recker

→ Further expert contributions to be announced shortly

### Relevance for Aluminium and Beyond

While the session will focus on aluminium applications, the insights, experiences, and technologies presented are highly relevant for the **steel industry** as well. As demanding surface inspection challenges drive process improvements, new solutions, and technology innovation, **both aluminium and steel producers will find valuable inspiration and transferable technologies** in this programme.

We warmly invite professionals from steel, aluminium and other non-ferrous metal sectors to join us in Aachen and take part in shaping the future of industrial inspection technologies.
