Alumobility – Fulfill the Promise of a Lighter, more Efficient and Sustainable Future by Collaboration

Dr. Thomas Rudlaff
General Manager, Alumobility

Abstract

Alumobility is a global ecosystem of leading aluminum and downstream technology partners that supports automotive manufacturers in creating lighter, safer, smarter and more sustainable vehicles. The non-profit association was founded to focus on technical studies to advance the adoption of aluminum automotive body sheet (ABS).

Working with global automakers, Alumobility will help deliver on the promise of a lighter, more efficient, and more sustainable mobility future.

In the presentation the targets of Alumobility will be explained and some of the project results will be presented and explained.
